"The Evolution of Injury Management towards better Business Practices"

Two Day Conference 18-19 March 2013
Brisbane Convention and Exhibition Centre

Employers around the world are developing employer based injury management strategies, systems and processes that:

- Improve injury management outcomes
- Compliment and support workplace culture
- Reduce the tangible and intangible cost of injury
- Successfully utilise management resources
- Effectively provide the holistic link to safety, health and wellness

The 2013 conference will be focused on effective business strategies that provide a holistic view of managing the risks associated with injury or illness in the workplace.

As industries evolve on many fronts, Safety and Health has become an integral and highly visible part of an employers commitment to the people they employ.

Interestingly, injury management has not evolved at the same rate with many employers still believing that care of employees following injury/illness rests solely or predominately with the insurer.

This conference is being developed from an industry/business perspective to assist employers identify, develop and deliver business practices that will produce better outcomes.

To feature:

- Commentary from major stakeholders
- Feedback from specialists working in the field
- Commentary from leading educational institutions
- Practical work examples from leading companies
- Award winning innovations

Who should attend?

- People involved in:
- Health and Safety
 - Injury Management
 - Rehabilitation
 - Human Resource management
 - Managing staff from medium to large employers
 - Providing services in the rehabilitation and health arena

Keep advised of conference developments by viewing www.injurymanagement2013.com
